

# 25 x 137mm Ammunition

- Land combat against personnel and light armoured vehicles
- Anti-aircraft defence
- Close-in naval combat

# 25 x 137mm ammunition

## MISSION

These combat and practice rounds are designed to be fired from 25mm automatic weapons operated by gas (KBA), by external energy (M811, M242 "Chain Gun"), or of the Gatling type (GAU12) fitted to anti-aircraft mounts, light armoured vehicles, naval vessels and aircraft.

These rounds meet the STANAG 4173 requirements (25 x 137mm ammunition).
